SUNGHYE PARK

UX Design Student

SUMMARY

UX design student with a growing interest in user needs, clear communication, and structured ways of working. My background in logistics has given me experience in coordinating multiple stakeholders and understanding how different processes connect. This helps me in my UX work when I try to see the whole picture and create clarity together with others.

EXPERIENCE

Industry Collaboration within UX Program

Karolinska Institutet Innovation AB (UX Research Collaboration)
Sep 2025 - Oct 2025

- Maintained continuous communication with stakeholders to create clarity and a shared understanding throughout the project
- Worked together with my team in Miro to structure ideas, plan next steps, and keep everyone aligned
- Conducted interviews with healthcare professionals to understand their workflows and challenges
- Analyzed interview material and identified recurring themes related to needs and pain points
- Summarized insights clearly and presented them to stakeholders to support decision-making

SEA/AIR Operations Coordinator

LX Pantos Logistics AB, Jönköping
Jan 2021 - Sep 2023

- Coordinated daily with multiple stakeholders and ensured alignment to maintain smooth, KPI-driven delivery processes
- Managed complex and time-sensitive logistics flows and solved unexpected issues quickly to ensure customer satisfaction
- Secured accurate information flow between systems and provided clear status updates to support decision-making

OTHER EXPERIENCE

Aside from my recent roles, I have also worked in café environments with fast pace and high service demands. This helped me develop good customer interaction and the ability to collaborate under pressure. I also have previous experience from warehouse and logistics work, which gave me a practical understanding of different stakeholders' perspectives and the importance of clear communication and reliable processes.
